EDUCATION

- **JAVASCRIPT REVAMP 2023**
36hr master course of advanced JavaScript
- **REACT FRON TO BACK**
Learn modern React by building projects with Firebase 9 and full stack MERN app
- **MERN STACK**
Build and deploy a full stack social media project with Node.js, Express, React, Redux&MongoDB
- **COMPLETE FLUTTER DEVELOPMENT BOOTCAMP WITH DART**
Officially created in collaboration with the Google Flutter team

PROFILE

Motivated software developer with over 4 years of experience in Web Developing and designing using TypeScript technologies. I build high performance production ready Web apps with NextJS on top of React. Seeking to leverage solid technical skills switching from freelancing to commercial development and advance my career as part of a team

SKILLS

- Got efficient with NextJS13 and Tailwind CSS
- Strong understanding of popular design MVC, MVP and MVVM patterns in software architecture
- Good knowledge of JavaScript / Type Script
- REST API middleware with Node and Express
- Developed CRUD operation in SQL server
- Build & consume typesafe tRPC APIs
- Comfortable with NoSQL JSON database structure
- Have experience with third party CMS integrations APIs
- Unit & Integration test with React Testing Library & Jest
- VCS via Git / GitHub

EXPERIENCE

- **ENTRY-LEVEL SOFTWARE DEVELOPE**

Freelancing – 2019

Creating simple client side Websites for my friends and improving my UI skills

- **JAVA PROGRAMMING MASTERCLASS**

Core Java 17 computer programming course

- **INVISION STUDIO FOR UI DESIGNERS**

Interface Design and Prototyping

LANGUAGES

English fluent, Russian native

HOBBIES & INTERESTS

- Build startups
- Lifting weights

MY GOAL

Want to start my journey like part of the development team in awesome projects and become more efficient full stack developer

STATUS

- Ready for interview
- Job ready in a week

- **MOBILE DEVELOPING / PROTOTYPING**

Freelancing – 2019–2021

Studying and working more on OOP programming with Java/Kotlin. Built some first native simple mobile applications with Android Studio. Spent half a year on cross-platform Flutter/Dart. Got more efficient with Material Design and UX

- **BACK TO WEB**

Freelancing – 2021–2022

Improving my skills building more complex Web applications with a MERN stack. Concentrated more on type safety programming. Creating collections of independent microservices with lightweight APIs and third parties integrations. Headless CMS and DB management ORMs. Managing my content and testing

- **WEB DEVELOPMENT**

Freelancing – 2022 till now...

Assisting entry-level guys helping them to start. Concentrated on developing more complex and stable production ready pieces of software. Start to develop my own projects focused on a lifecycle of an application. Interested in Video streaming projects as well as MDX blogs and new approaches in UI/UX.

MY TEACHERS

**Brad
Traversy**

**Jack
Herrington**

**Dave
Gray**
